

ROYALTY NFT

META
FORCE

Meta FORCE

is a whole Universe of cryptocurrency and decentralized tools, in which everything is interconnected

We are introducing our program, which is the beating heart of all MetaForce Programs

Royalty NFT helps to strengthen the motivation of increasing selections, which drives the development of our Community. By participating in the program, you acquire a profit and maintain the balance of our system.

Royalty NFT

What is

Royalty NFT?

Royalty NFT is a status program where you receive Royalty Bonuses, and it is implemented in the NFT format

The status program consists of 7 NFT levels.

Royalty bonuses are credited based on the total product turnover of the Meta Force programs.

What are bonuses

Royalty NFT?

Royalty NFT bonuses represent a portion (share) of the total product turnover

The higher the status of your NFT, the higher the bonus you will receive.
There are seven levels.

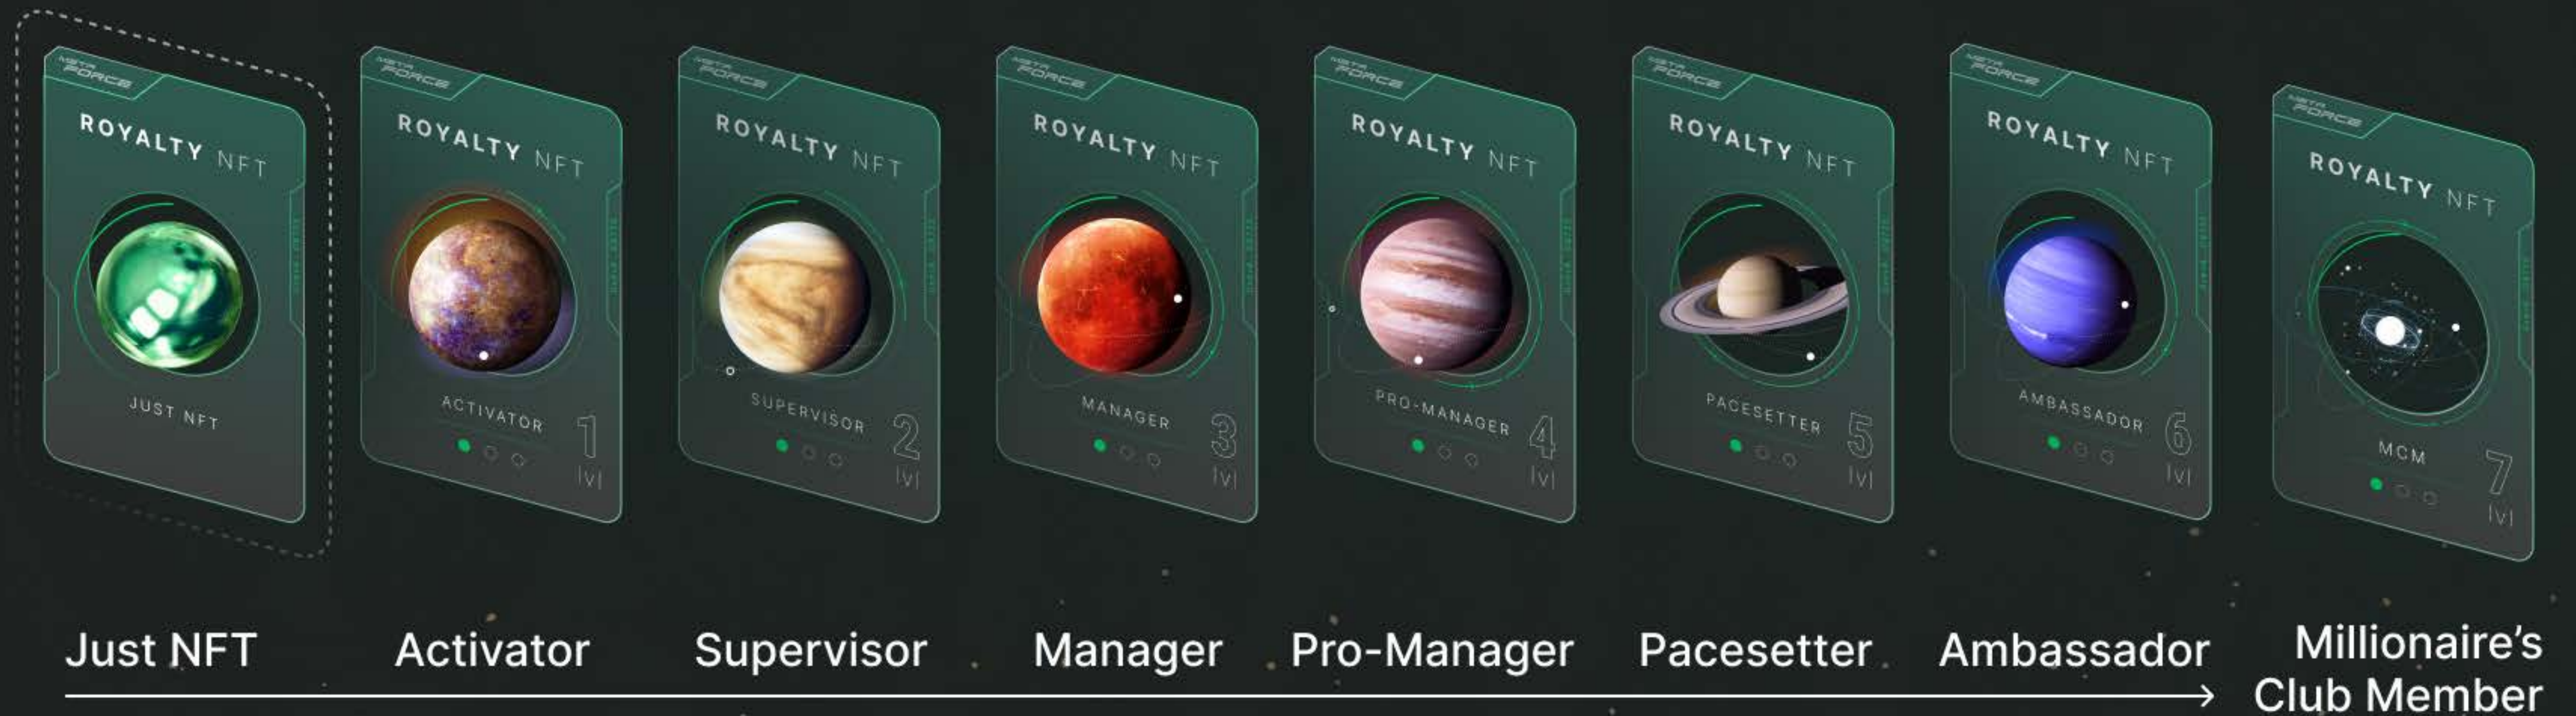

Royalty NFT

Each participant with NFT, having a status, receives bonuses, the amount of which depends on its level of NFT status.

The total amount of bonuses can be increased in proportion to the growth of Royalty NFT status.

Levels & Status

An NFT may have one of the status levels:

Royalty NFT

How to get

Royalty NFT?

By participating in the Classic program, upon reaching the fifth level in the matrix slots, you can generate one NFT Royalty — for one account. It is possible to get NFT in this way only once.

Each participant can sell NFTs — accordingly, anyone can buy an unlimited number of NFTs.

At this stage, getting an NFT is simple. After the start of UniteVerse, the condition for a similar gain will be: 5 levels in Classic plus 3 levels in UniteVerse.

In the future, to get Just NFT for free, you will need additionally to have levels in other marketing programs as well. As the system grows and develops, getting Royalty NFT will become more difficult.

BUY

Royalty NFT

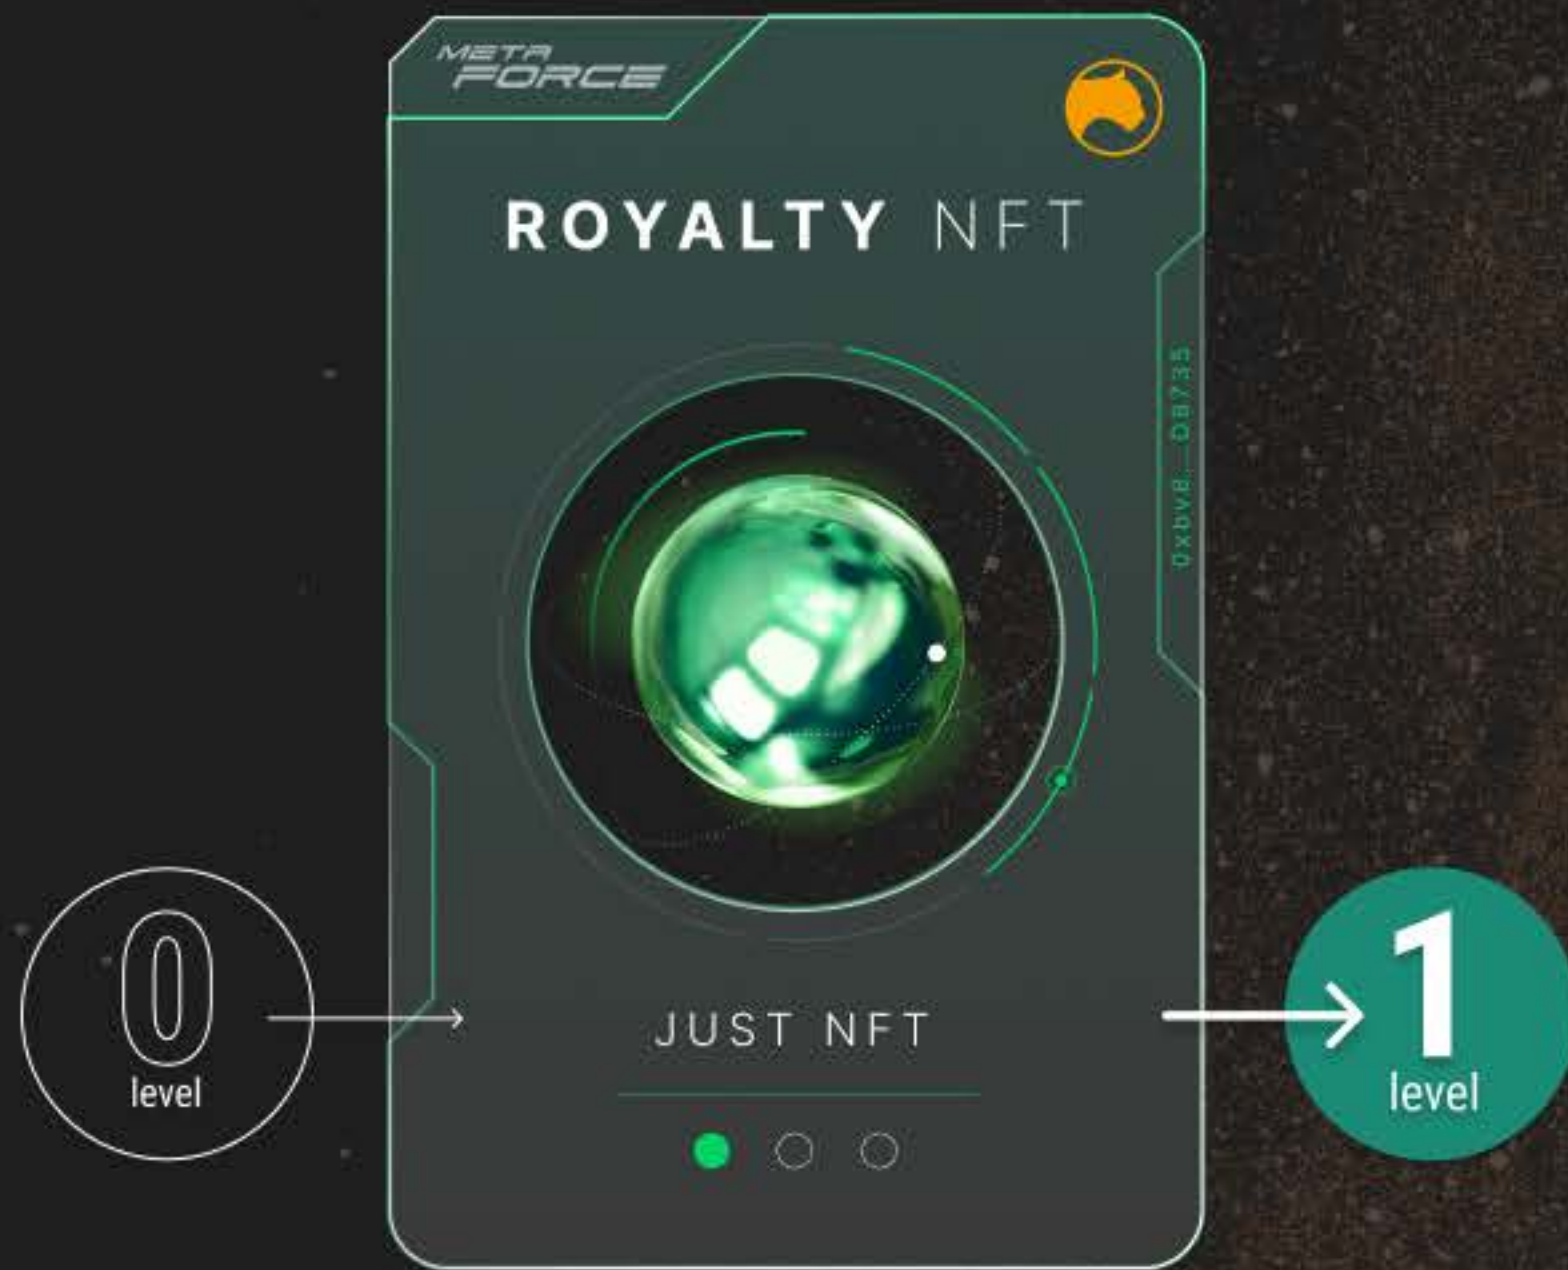

How to buy

Royalty NFT?

The opportunity to purchase NFTs will be open to everyone

The easiest way is to buy the Royalty NFT on the OpenSea marketplace, where you can trade NFTs.

Just NFT

Royalty NFT

Just NFT is a basic zero-level NFT

By charging the NFT with Energy you achieve statuses that provide you with income from the global revenue pool.

Just NFT has no status, therefore, does not receive a share from the turnover.

In order to start receiving income from the revenue, your NFT should reach at least the first status.

You will need 3500 Energy tokens to reach level one, unlocking the Activator status.

Energy tokens are awarded for different types of activity in Meta Force programs.

In the future, there will be plenty of opportunities to accumulate Energy, but charging your NFTs will become harder.

After you charge the basic NFT to 1st status level - Activator, the system will mint a new Just NFT for you.

The first participants receive SFC / SFC2 for participating in the matrix program, which can be used as Energy.

SFC, SFCR SFC2, SFCR2

The earliest participants received an SFC, which can be used as energy with a maximum coefficient, 1 to 1.

The moment Royalty NFT launches, emission of SFCs stops. It is replaced by SFC2.

SFC2 for **activating** and SFCR2 tokens for **reactivation**. The SFC2 to Energy ratio is 2 to 1, which is two times lower than the SFC, although still a high coefficient.

Keep in mind that SFC2 is a temporary bonus at the start-up stage.

SFCR and SFCR2 can have the same value properties as SFC and SFCR2, on condition to the corresponding product turnover, which will be possible to realise after product launch.

Energy

Energy for the NFT Royalty program can be obtained for a variety of volume-generating activities in Meta Force.

Charging is easier in the early stages, but gradually it will become more complicated in the future.

Receiving SFC & SFC2 tokens for slot activation in the matrix program is a limited opportunity during the pre-launch period (as well as SFCR & SFCR2 for reactivation). They can be used as Energy.

Purchase of products — by you, or by your partners and customers of your structure, can bring you Energy. Purchases of such products include, among other things, **activity in games**, if a participant makes purchases in them.

Energy cannot be sold (and bought) directly. However, the participant can **sell the NFT** charged with Energy tokens.

Another participant may use the **purchased NFT** along with its Energy to merge with another NFT he own in order to merge their Energy.

Significance of status

Royalty NFT

Status, even at the minimal level, is a privileged one, as for this NFT impressive accruals from world income are allocated

Because of the difficulty of obtaining status, the value of the NFT is high.

In case you are not ready to achieve even the minimum status, you have the option of selling the NFT.

Status upgrade

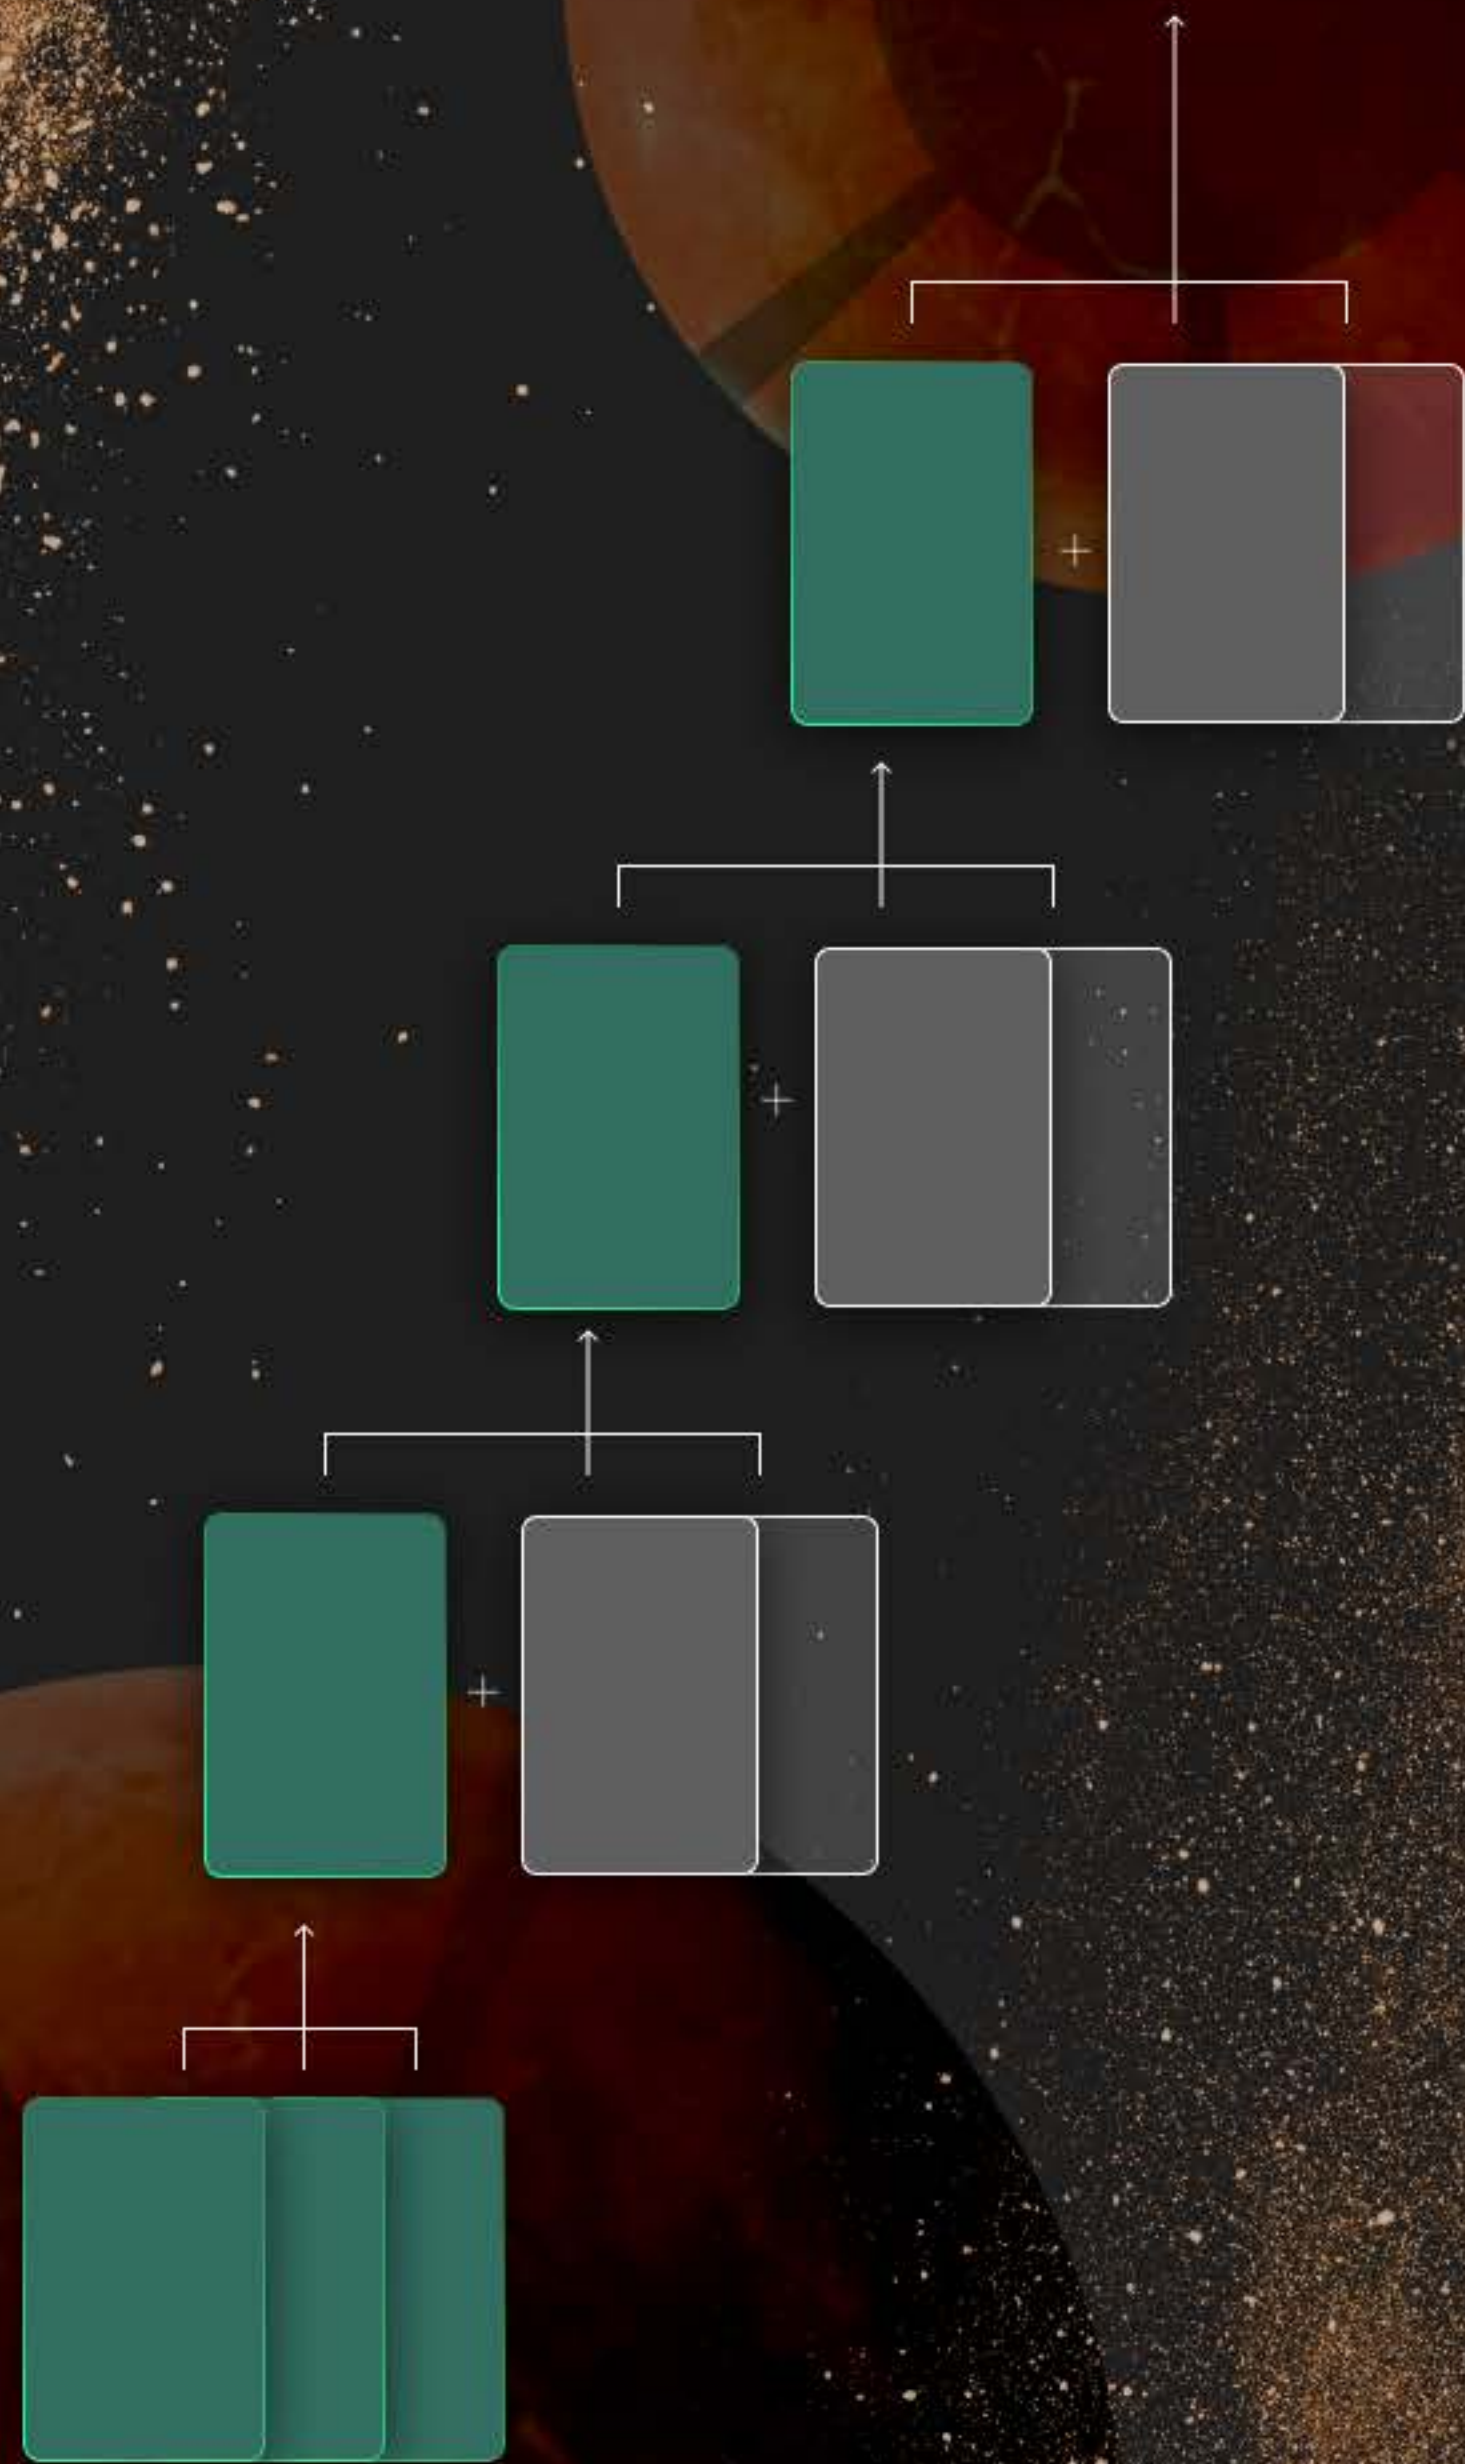

Royalty NFT

After reaching the first status, NFTs upgrade method will change

To **get next status** - Supervisor, you will need to collect **three NFTs** with level 1 status — Activator and **combine** them.

After the merge, three **NFT Activators** — are burned, and in their place, you will have one NFT — Supervisor.

Further upgrade of the NFT to new levels takes place according to a similar scheme

Charging your Just NFT to Activator status is done by having three Activators and converting it to one Supervisor. Then you go through this process again. You merge three Supervisors, which upgrades you to one NFT of the next level, Manager.

Your path continues in the same logical way. Merging three NFTs of the same status gives you one NFT of the next status level.

3 NFT Activator → 1 NFT Supervisor

3 NFT Supervisor → 1 NFT Manager

3 NFT Manager → 1 NFT Pro-Manager

3 NFT Pro-Manager → 1 NFT Pacesetter

3 NFT Pacesetter → 1 NFT Ambassador

3 NFT Ambassador → 1 NFT MCM (Millionaire's Club Member)

Royalty NFT

By owning NFTs, you receive an income in the form of bonuses

The higher your level and the number of NFTs you own, the greater your income will be!

Percentage of bonuses awarded

30% of the volume of Meta Force products form a pool for Royalty bonuses.
These are the most generous Royalty bonuses ever!

The pool is distributed among the statuses as follows:
