Tactile matrixes
have 12 slot levels

As soon as Loyalty Program
start, the higher slot level
in your matrix, the more
Cashback Tokens you
can earn

100% goes to the partners network,
that's — your and your partners
income

Marketing Tactile

Tactile program uses two types of matrices at the same time, s6 & s3.
The digital value corresponds to the number of spots in the matrix, respectively - 6 & 3.

It is in the tandem of the two types that their force is manifested. Each of these matrices has its pros and cons.
In a single program, the pros outweigh the cons.

Marketing Tactile

The first level of the slot is an s6 scheme, the second slot level is also s6, and the third is s3 scheme

Then it repeats two through one:

the fourth and fifth - s6, the sixth - s3, the seventh and eighth - s6, the ninth - s3, the tenth and eleventh - s6, twelfth - s3.

On the first stage of marketing, we operate on the stablecoin DAI on Polygon network, and on the second stage, as soon as the Loyalty program starts, you'll pay in cashback tokens to enter matrix, and earn in Forcecoin.

By activating matrix levels, you increase cashback percentages that you receive from Tactile products.

LEVELS → CASHBACK REWARDS

Where To Start For A Beginner?

To start a Meta Force business, you need DAI on the Polygon network. It is a stablecoins, so it's equal to \$.

For all transactions you need to have at least a few MATIC coins in order to pay fees.

Your first transaction will be null - this is a registration. By registering once, in the future you can activate any program without new registering. That is, by the time next programs are launched, you will be able to log in earlier.

Register using the referral link of the person who opened this business for you. And then you have more chances that people you invited to register strictly according to your referral link.

Referral connections are saved for all our programs.

UNIFIED PLATFORM

SINGLE SIGN-ON

Level 1 • 5 DAI

→ 5^{DAI}

Activating the 1st level of the matrix costs 5 DAI (which is equal to 5 dollars).

^s6

Marketing System EXPLANATION

As soon as the payment is made, it is instantly sent to the wallet of the higher partner, and you fill the matrix of your inviter.

At the same time, your own matrix opens up, in which there are 6 spots under you, two on the 1st line and four on the 2nd.

It is possible that a part of your matrix is inside the matrix of your upline, if you got to him in the 1st line.

The way upline sees

The way you see

Marketing System EXPLANATION

Filling in your matrix is possible both with your actions, if you invite, and spillovers from above, from a higher partner, as well as spillovers from below - when downlines who came over spillover are inviting.

Thus, with the whole team you fill in the spots, and the payments to you do not depend on whose invitee is the one who filled the spot of your matrix. Payouts in this slot come to you from the 2nd line. These are 4 payments of 100%.

When new participants activate their spots in your matrices, the funds sent directly to your wallet, or otherwise bring you income.

Level 1 • 5 DAI

Re-Activation

The last payment in matrix is intended for re-activation. It is activation of the same matrix when the previous one is completely filled. It is best to do this automatically, instantly after closing the previous one, so as not to miss income.

Therefore, the "auto-reactivation" mode is enabled by default.

If someone wants, they can disable this mode in their personal account. We provide freedom of choice. However, in this case, you will receive 75% from funds intended for re-activation, and there will be no new cycle. If you leave it on, all 100% will be used for you re-activation.

Your partners also have a reactivation (if they do not turn it off). And they again take spot in your new matrix, and you receive income.

Auto-Upgrade

Thanks to Auto-Upgrades, you and your partners will not miss the profit and will increase the slot levels

Two payments are for auto-upgrade, if your next slot level is not activated

By default, auto-upgrade switched on at your top active level. Except for the 12th, the topest one, of course.

Each next slot level costs exactly twice as much as the previous one, so you need to collect two payments, respectively. One payout is stored in a special smart contract for this, to which no one has access except you.

Then, as soon as another payout appears, the amount is combined, and the next slot level is instantly activated. Your downline partners will have the same, and thus your next slot level will fill up.

  Upline
  Re-Activation
  Re-Upgrade

Auto-Upgrade

OFF

When auto-reactivation and/or auto-upgrade is enabled, you receive 100%. When auto-reactivation and/or auto-upgrade is disabled, you receive 75%.

In this way, it turns out to be much fairer than in the old system, in which those who wanted to develop the structure often lost money by mistake. In the new version, the commission will be removed from those who do not want to develop, and these funds will benefit everyone.

Initially, these funds are used to develop Meta Force products. As soon as Tactile switches to forcecoin, these funds will simply be burned, which will increase the value of forcecoin.

Marketing Tactile

Accordingly, at the 1st slot level, you have auto-upgrade enabled by default, if the 2nd slot level is not already activated.

If you have already activated the 2nd level of the slot, then your 1st slot level do not need upgrade.

Similarly - at the next slot levels.

Marketing Tactile

We recommend that most participants activate at least 5 levels of slots from the very start in order not to lose profit, because many will do this, and you need to have active matrices to make a profit.

In this case, auto-upgrade is at the 5th slot level, after which the 6th slot level is activated. The 6th slot is s3, respectively, here, instead of 6, there are only 3 spots in one line.

Such a matrix (s3) gives the fastest income to active participants. You do not need to wait for the 1st line to be filled, you immediately receive 100% from everyone who fills your matrix. Total 300% income, of which 200% is net profit.

Marketing Tactile

In total, the marketing Tactile program has

12 slot levels

Every three levels, the sequence is repeated:
two matrices with 6 spots in two lines, 2+4, and one matrix with three spots in one line.

All of them move at the same time, in parallel, and all at the same time bring profit.

Each next slot level can only be activated sequentially, one after another:

after the first - the second,
then - the third,
then - the fourth, etc.

Tactile Matrix Prices

Level 1 5 DAI	Level 2 10 DAI	Level 3 20 DAI
Level 4 40 DAI	Level 5 80 DAI	Level 6 160 DAI
Level 7 320 DAI	Level 8 640 DAI	Level 9 1 280 DAI
Level 10 2 560 DAI	Level 11 5 120 DAI	Level 12 10 240 DAI

Levels Prices

Each next level costs exactly
twice (2x)
as much as the previous one

Marketing Tactile

Most will rely on much more modest start, for example, 5 levels of slots, which will cost only \$155 at the pre-launch.

Now, let's calculate what income and profit you have here.

Marketing Tactile

Net profit is what you receive directly to your wallet. Income is taking into account the last payment in the matrix leaving for reactivation.

At the end of each circle of matrix, you have a net profit, plus a new activated matrix that will bring you even more income.

If you add up the income from one circle of all slot levels, you get the amount of 70,200 dollars. And the net profit is 49725. And this is only from one circle of each slot. In reality it will be even more because there will be more circles of slot levels below.
